Replication Notes

This file creates a replication file containing the supplementary tables and figures from Seim, Brigitte, Ryan Jablonski and Johan Ahlback. “How Information about Foreign Aid Affect Public Spending Decisions: Evidence from a Field Experiment in Malawi” in the *Journal of Development Economics*.

This code was originally run on RStudio Version 1.2.5033 with R 3.5.0. All data has been anonymized to protect respondents.

For questions about this replication contact Ryan Jablonski at r.s.jablonski@lse.ac.uk.

Table A3 global multiple comparison

Due to the large number of simulations, this code will take a very long time to run. The code is currently set to 100 simulations, though results will vary at this N. The published results are based on 1,000 simulations.
